Town of Berkley
Soil Conservation Board
1 North Main Street
Berkley, MA 02779

Re: Land of Cape Cod Aggregates
Off Bryant Road, Berkley, MA

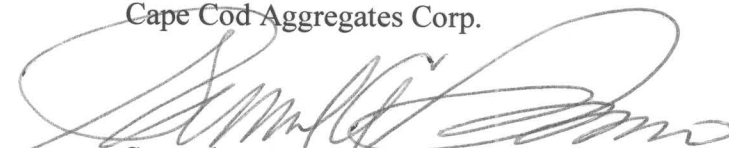

Dear Board Members:

After listening to questions and concerns related to our proposal, we have decided to withdraw, without prejudice, our pending Earth Alteration Permit application before the Town of Berkley Soil Conservation Board. We will be revising and improving our plans, and resubmitting our application after addressing in comprehensive detail all project issues raised, the many benefits of our plans and the myths and realities of the aggregate industry.

We believe that our project can be operated as a positive benefit to the community and in such a way as to address satisfactorily all issues raised. We look forward to re-filing our proposal and to working closely with town officials, members of the community, and community organizations and their representatives.

We are fully committed in every way to the project and intend to move forward after thoughtfully considering these issues. We are confident our project will benefit community needs, such as local schools and municipal services, through the generation of significant annual project fees and contributions.

Sincerely,
Cape Cod Aggregates Corp.

Samuel A. Lorusso, President
